All superchargers included in street systems have a standard 3-year limited warranty. (NOTE: Install times listed are a general estimate, actual installation time may vary. System boost estimates are based on a stock engine at the stock rev limit at sea level. Polished systems available (at additional cost). CW = clockwise, CCW = counterclockwise, LPH = liters per hour, TBD = to be determined)

*Supercharged horsepower and torque data shown is a calculated estimate based on percentage increases from actual rear wheel hp/tq measurements.

1 = 1995-97 LT1 Camaros and Firebirds with traction control will require the purchase of a traction control relocation kit (available from Vortech at an additional charge), aftercooler system will not fit vehicles with traction control.

2 = 1996-97 LT1 Camaros, Firebirds and 1996 LT1 Corvettes may require the purchase of a mass air sensor massager P/N 4GM020-030 (available from Vortech at an additional charge)

3 = Ram air models, 4 = Not for use on vehicles equipped with "returnless" fuel systems, 5=1996-1998 Models, 6= 1999 and up models 7=Released for manual transmissions only 8=excludes 2004 models

Calculating belt length by part number: The last three digits of most belt part numbers is the belt length in inches, example: P/N 2A046-535, belt length is 53.5". PRODUCT DISCLAIMER: All specifications

in the application guide are based upon the latest product information available at the time of printing. All products are subject to change without prior notice.

VORTECH ENGINEERING, LLC, 1650 PACIFIC AVENUE, CHANNEL ISLANDS, CA 93033 (805)247-0226 P, (805)247-0669 F, VORTECHSUPERCHARGERS.COM

All superchargers included in street systems have a standard 3-year limited warranty. NOTE: Install times listed are a general estimate, actual installation time may vary. System boost estimates

are based on a stock engine at the stock rev limit at sea level. Polished systems available (at additional cost). CW = clockwise, CCW = counterclockwise, LPH = liters per hour, TBD = to be determined

*Supercharged horsepower and torque data shown is a calculated estimate based on percentage increases from actual rear wheel hp/tq measurements.

1 = 1995-97 LT1 Camaros and Firebirds and traction control will require the purchase of a traction control relocation kit (available from Vortech at an additional charge), aftercooler system will not fit vehicles with traction control.

2 = 1996-97 LT1 Camaros, Firebirds and 1996 LT1 Corvettes may require the purchase of a mass air sensor messenger P/N 4GM020-030 (available from Vortech at an additional charge)

3 = Ram air models, 4 = Not for use on vehicles equipped with "returnless" fuel systems, 5=1996-1998 Models, 6= 1999 and up models 7=Revised for manual transmissions only 8=excludes 2004 models

Calculating belt length by part number: The last three digits of most belt part numbers is the belt length in inches, example: P/N 2A046-535, belt length is 53.5". PRODUCT DISCLAIMER: All specifications

in the application guide are based upon the latest product information available at the time of printing. All products are subject to change without prior notice.
